

**EFORWOOD**

Sustainability Impact Assessment  
of the Forestry - Wood Chain

Project no. 518128

EFORWOOD

Tools for Sustainability Impact Assessment

Instrument: IP

Thematic Priority: 6.3 Global Change and Ecosystems

**Deliverable D6.2.1 (b), update  
Enhanced Interactive internet based information portal**

Due date of deliverable: Month 26

Actual submission date: Month 27

Start date of project: 011105

Duration: 4 years

Organisation name of lead contractor for this deliverable: **InnovaWood Ltd.**

Final version

<b>Project co-funded by the European Commission within the Sixth Framework Programme (2002-2006)</b>		
<b>Dissemination Level</b>		
<b>PU</b>	Public	X
<b>PP</b>	Restricted to other programme participants (including the Commission Services)	
<b>RE</b>	Restricted to a group specified by the consortium (including the Commission Services)	
<b>CO</b>	Confidential, only for members of the consortium (including the Commission Services)	

## **D6.2.1 Interactive internet-based information portal**

[www.eforwood.com](http://www.eforwood.com)

**The new EFORWOOD Portal was developed using the DNN platform. The DNN platform offered more flexible and user friendly structure.**

**The key new features that were introduced are the following:**

1. Cross site search
2. Wiki module
3. Smart Thinker used for Event management including meeting registration tool
4. New features for the Forum (notification system, direct document upload with post)
5. New news module with possibility of rating, comments and use of different categories
6. RSS News Feed
7. New feedback feature
8. Media module (use to upload and display media files)
9. FAQ (Frequently ask questions)

The new site also have different look and feel and improved navigation structure (a drop down menu has been introduced and some reduction in number of the site pages has been achieved). The site content was improved by editing the fresh information in already existing sections and adding some new sections (ToSIA, EFORWOOD conference, Project results etc.)

The below screen shots show some of the changes that have been done.

## Home page – public view

The screenshot shows the EFORWOOD website home page. At the top, there is a navigation menu with links for Home, About, News, Events, Consortium, Tosia, Results, and Contact. The EFORWOOD logo is on the left, and the title 'Sustainability Impact Assessment of the Forestry-Wood Chain' is centered. Below the navigation, there is a 'You are here: Home' breadcrumb and a search bar. The main content area is divided into several sections: 'ABOUT EFORWOOD' with a forest image and a description of the project's aim; 'TOSIA' with a description of the Decision Support Tool; 'LATEST NEWS' with a list of recent events and reports; 'EFORWOOD in brief' with key project statistics; and 'PROJECT RESULTS' with detailed descriptions of two reports. Social media icons for RSS and Facebook are visible at the bottom right.

**ABOUT EFORWOOD**

The aim of the project is to provide methodologies and tools that will, for the first time, integrate Sustainability Impact Assessment of the whole European Forestry-Wood Chain (FWC), by quantifying performance of FWC, using indicators for all three pillars of sustainability; environmental, economic and societal.

[» Read More](#)

**TOSIA**

The Decision Support Tool ToSIA (Tool for Sustainability Impact Assessment) is the predominant product of EFORWOOD. It represents a dynamic sustainability impact assessment model that is analysing environmental, economic, and social impacts of changes in forestry-wood production chains, using a consistent and harmonised framework from the forest to the end-of-life of final products.

**EFORWOOD in brief**

**Thematic Priority:** Global Change and Ecosystems  
**Duration:** November 2005 - October 2009 (4 years)  
**Budget:** €20 million  
**Partners:** 38 organisations

**LATEST NEWS**

**Instituto Superior d'Agronomia -ISA hosted training session on Indicators** by admin  
The aim of the session was to share experiences on best practices in data collection and to provide guidance on how to calculate/estimate indicator values for which data are not readily available.

**First EFORWOOD Conference held in Brussels** by admin  
The first EFORWOOD Conference took place in Brussels on 1st and 2nd October 2007, hosted by three confederation partners in the project, CEPI, CEI-Bois and CEPF.

**M3-Scenario-Meeting in Freiburg** by admin  
The aim of this meeting was to discuss the philosophy of status quo, and storylines of the reference futures for A1 and B2 scenarios.

**Second Expert Advisory Panel meeting takes place** by admin  
The second Expert Advisory Panel meeting took place on Brussels on 14th June 2007.

**First ToSIA prototype has been launched** by admin  
The first prototype of the ToSIA (tool for sustainability impact assessment) has been produced.

**PROJECT RESULTS**

**Description of modelling framework and First prototype TOSIA-FWC in open source technology for single chains.** This combined deliverable report 1.4.3/1.4.5 presents ToSIA (Tool for Sustainability Impact Assessment), predominant product of EFORWOOD.  
[» Read More..](#)

**Description of forest production processes: report including analysis and description of current production processes for various relevant sites and forest types.** This report describes the selection of relevant tree species and relevant sites to be considered within Europe to cover approximately 80% of the produced wood material.

## New news module

The screenshot shows the EFORWOOD website news page. The navigation menu and header are identical to the home page. The breadcrumb trail is 'You are here: News'. Below the navigation, there are links for 'Current Articles', 'Categories', 'Search', and 'Syndication'. The main content area displays two news items with their dates, titles, authors, and brief descriptions. Each item has a 'Read More..' button. On the right side, there is a 'News Archive' section with a list of months and the number of articles for each month.
